

Recipeorganizer planner project guide pdf

C:\Users\ASUS\OneDrive\Desktop\projects\Recipeorganizer

☒ **STEP 1: Check folders**

Ye command chalao: **dir**

👉 Batao output me recipeplanner folder dikh raha hai ya nahi.

☒ **STEP 2: recipeplanner folder ke andar jao**

Agar recipeplanner dikh raha hai, to:

cd recipeplanner

Ab fir check karo: **dir**

👉 Yahan **manage.py** file dikhni chahiye ☒

☒ **STEP 3: Virtual environment check**

Ab dekho venv folder hai ya nahi: **dir**

Case A: venv dikh raha hai :- **.\venv\Scripts\Activate.ps1**

Case B: venv nahi dikh raha

Create + activate: **python -m venv venv**

.\venv\Scripts\Activate.ps1

Prompt aisa ho jana chahiye: **(venv) PS C:\Users\ASUS\...**

☒ **STEP 4: Server run karo**

python manage.py runserver

Browser: <http://127.0.0.1:8000/>

Ab bas ye 2 cheez confirm karo 🙋

1 manage.py dikh rahi hai? (haan / nahi)

2 (venv) activate hua ya nahi?
